7/4 B Ragu Nath Das Lane Kaltabazar, Dhaka-1100 | github.com/sheikh-asif-rahman |

Professional Summary

Full Stack Software Engineer with 2+ years of experience designing, developing, and deploying scalable web applications, RESTful APIs, and enterprise healthcare systems. Proficient in React.js, Node.js, Django, Flutter, and Microsoft SQL Server with strong expertise in frontend architecture, backend development, system integration, and database-driven solutions. Experienced in Agile software development, debugging, performance optimization, and multi-branch enterprise system deployment.

Technical Skills

Programming Languages:

JavaScript | Python | Dart | SQL

Frontend Development:

React.js | Flutter | Tailwind CSS | Bootstrap | HTML5 | CSS3

Backend Development:

Node.js | Django | RESTful APIs | Authentication & Authorization

Databases:

Microsoft SQL Server | Firebase

Tools & Platforms:

Git | GitHub | Linux (Ubuntu)

Concepts:

Data Structures & Algorithms | Object-Oriented Programming (OOP) | Agile/Scrum | Software Development Life Cycle (SDLC) | Debugging | Responsive Design | Performance Optimization

Professional Experience

Software Engineer | Executive IT

Labaid Diagnostic Kolabagan | May 2023 – Present

- Developed and maintained a centralized HRMS platform supporting attendance, leave management, and employee operations across 34+ branches
- Built and integrated RESTful APIs using Node.js for seamless frontend-backend communication
- Designed scalable and responsive web applications using React.js, improving internal operational efficiency
- Automated laboratory and diagnostic workflows, improving sample tracking and reporting accuracy
- Diagnosed and resolved LIS / HIS system issues, reducing downtime and improving system reliability
- Collaborated with cross-functional international development teams to deploy new modules and software upgrades
- Provided system administration, troubleshooting, and remote technical support across multiple enterprise branches
- Enhanced application performance, debugging workflows, and database query efficiency

IT Intern

Labaid Specialized Hospital | Feb 2023 – Apr 2023

- Assisted in the implementation and configuration of Hospital Information System (HIS) modules for clinical and administrative workflows
- Tested CRUD-based laboratory automation features, improving data entry accuracy and workflow efficiency
- Supported the design and enhancement of IPD and OPD modules, streamlining patient information handling and service processes
- Built a doctor profile and appointment management system for online healthcare service operations
- Performed debugging, testing, and deployment support for newly boosted application features

Projects

AKHIL HIS – Hospital Information System (Implementation & Deployment)

Role: Implementation Team Member

Tech Environment: HIS, LIS, OPD/IPD Modules, SQL Server, Workflow Configuration

- Served as a core member of the implementation team for enterprise hospital management software used in clinical and diagnostic operations
- Configured and deployed modules including OPD, IPD, laboratory, billing, and diagnostic workflows
- Collaborated with developers, doctors, and administrative teams to align system workflows with operational requirements
- Performed user acceptance testing (UAT), issue tracking, and post-deployment support
- Assisted in troubleshooting workflow, configuration, and data handling issues during production rollout

HRMS Application – Multi-Branch Employee Management System

Role: Full Stack Developer

Tech Stack: React.js, Node.js, Microsoft SQL Server

- A centralized HRMS platform for attendance, leave, and employee activity management across 34+ branches
- Built RESTful APIs and integrated frontend-backend services for real-time data operations
- Implemented role-based authentication and authorization
- Planned responsive user interfaces and optimized reporting workflows
- Improved data synchronization and system performance for enterprise-scale usage

Labaid Cardiac Hospital Website Prototype

Role: Frontend / Prototype Developer

Tech Stack: React.js, Node.js, Tailwind CSS

- A functional website prototype to present the digital concept for hospital web presence
- Built responsive UI layouts for homepage, service pages, doctor profiles, and appointment flow

Education

- Bachelor of Science in Computer Science & Engineering
Notre Dame University Bangladesh | CGPA: 3.36 | Year: 2024
- Higher Secondary Certificate (HSC) – Science
St. Gregory's High School & College | GPA: 4.25 | Year: 2019
- Secondary School Certificate (SSC) – Science
Islami Govt. High School | GPA: 5.00 | Year: 2017

Certifications

- Basic and Advanced Networking (Router & Cyber Security) – One Sky Communication Ltd.
- Python Developer – Sololearn.

Core Competencies

Problem Solving | Software Development | System Design | Process Automation | Network Connectivity & Troubleshooting | Machine Operation | Technical Handling | Team Collaboration & Communication

Languages

Bangla (Native) | English (Professional Working Proficiency) | Hindi (Professional)
